The **Atkinson Tanktop** has been designed and developed for the oil heating industry by **Atkinson Equipment Ltd.**

This new initiative product has all the components required for drawing fuel oil from the top of the storage tank in one unit. It is in fact the new Atkinson Tankmaster for the 21st century. Six components in one product:

1. Floating suction line .
2. Non-return Valve.
3. Fully serviceable filter system.
4. Anti-Siphon valve.
5. Easy prime button.
6. Push fit pipe connection.

With top off take it is imperative that joints are well made, so with only one joint to make, Tanktop is the answer to an engineer's dreams.

This unique product is protected by design certificates across Europe. No 000472493-0001.

Atkinson Equipment has drawn on the experience that it has built up over the 40 years that it has been making products for the Oil Heating Market along with that of Burner Manufacturers, Tank Manufacturers and Heating Engineers. It is a product supported by the Environment Agencies and OFTEC due to the fact that it incorporates an anti-siphon valve to prevent fuel siphoning from the tank in the event that the oil line is broken thus avoiding environmental pollution.
